Congratulations

Congratulations on your purchase of the Siemens Gigaset 4010 telephone system! This phone's 2.4 GHz frequency and high-speed digital voice encoding provide reception and voice clarity that is superior to other cordless phones. And, its digital spread spectrum technology will provide you with secure, private conversations.

Installing the Telephone System

Connecting the Base Station

Power supply unit
(110 V AC/60 Hz
with cord)

- Insert the small plug on cord into phone jack
- Place cord in the base cable channel
- insert power supply unit into wall outlet

- Insert plug on the telephone cord into telephone jack on base unit (clicks into place)
- Place cord in cable channel on the bottom of the base
- Insert other end of plug into telephone jack on the wall
- The installation of the base unit should allow at least 8 inches between the base and persons to be in compliance with FCC RF exposure guidelines

- Only use the power supply unit included as indicated on the underside of the base.
- Use the telephone cord supplied. Do not use any old cords.
- Do not use an outlet controlled by a wall switch.

Installing the Telephone System

Press Keys:

Setting Up the Handset

Remove the protective plastic film from display.

Inserting the batteries

- Insert the batteries, as shown above.
- Place cover and push gently upward until it clicks into place (the unit is shipped with the battery cover off).
- To open, press the grooved area on the cover and slide back.

- Use only "AA" rechargeable NiCd or NiMH batteries. Do not use Alkaline, Lithium or non-rechargeable batteries.
- Never use non-Siemens charging units as these could damage the batteries and phone.

Placing the Handset into the Base Station and Charging the Batteries

Before using your handset, place it in the base station with the display facing upward. After about one minute, the handset's internal number is shown in upper left hand corner of display (for example, "1").

For information on how to register additional handsets (bought separately), see page 25.

Note:

Your Gigaset is now ready for operation. Please set date and the time (see page 7), so that the time of incoming calls can be noted correctly.

Installing the Telephone System

Press Keys:

Leave the handset for about 12–14 hours in the base station to charge the batteries. The charging status symbol flashes on the handset, indicating that the batteries are being charged:

 Batteries empty (symbol flashes)	 Batteries $\frac{2}{3}$ charged
 Batteries $\frac{1}{3}$ charged	 Batteries fully charged

- Once the initial charging operation is completed, replace your handset into the base station after each call. Charging is controlled electronically. This ensures optimum charging and prolongs battery life.
- The batteries heat up during charging. This is normal and not dangerous.
- The battery charging status is correctly displayed only after uninterrupted charging/discharging. You should therefore avoid opening the battery compartment unnecessarily.

Attaching the Belt Clip

Push the belt clip onto the back of the handset until the tabs click into place.

Installing the Telephone System

Press Keys:

Turning Handset On/Off

To turn handset on/off, hold down the End key – you will hear a confirmation beep*.

The handset is turned on as soon as you insert the batteries and place the handset in the base station.

Turning Keypad Lock On/Off

You can disable the handset keys when carrying the unit in your pocket or bag. This protects the keypad against inadvertent activation. If there is an incoming call, the key lock is automatically turned off and turned on after the call has ended.

Answering a call: Press the Talk key.

To turn keypad lock on/off, hold down the pound key – you will hear the confirmation beep*.

911/Emergency Calls cannot be made when the keypad is locked.

Headset

- Insert the headset plug into the jack on the left side of the handset.
- To answer a call, press the -key.
- To end a call, press the -key.

Headsets may be purchased separately.

* Confirmation beep = rising tone sequence,
Error beep = falling tone sequence.

Press Keys:

Date and Time

Setting the Date and the Time

The date and time settings are necessary in order for the date and time of the arrival of messages/incoming calls to be displayed correctly. If you subscribe to Caller ID, the time and date will be automatically set with the first incoming call. If not, manually set by using the steps below. You can also set the clock mode, to the 12 hour mode (AM and PM) or 24 hour mode.

- The default setting is 12 hour mode.
- If you subscribe to Caller ID the date and time may be sent from your telephone service and will be automatically set..

Date

Open the Menu.

Scroll to Base Setting and press OK.

Scroll to Clock and press OK.

Select Date and press OK.

The current setting is displayed in the MM-DD-YY mode.

For example:

0 OPER 5 JKL 2 ABC 5 JKL 0 OPER 1 a.d

← →

OK

Enter the month/day/year (for example, 05-25-01 as shown).

If necessary, skip to a digit to correct it.

Save the setting by pressing OK.

Time

Open the Menu.

Scroll to Base Setting and press OK.

Scroll to Clock and press OK.

Scroll to Time and press OK.

Setting the Alarm

Your Gigaset has an alarm function to help you keep track of your schedule.

A prerequisite for this function that you have set date and time (see page 7).

Turning the Alarm On

The active alarm rings every day at the set time.

Open the Menu.

Scroll to Alarm Clock and press OK (marked with a ✓).

Enter the time for the alarm (hours/minutes).

For example, 10:30 AM as shown.

If necessary, skip to a digit to correct it.

Save the setting by pressing OK.

The asterisk indicates that the alarm clock is set.

Then select AM or PM and press OK.

Turning the Alarm Off

The alarm clock is set, but you do not want the alarm to sound.

Open the Menu.

Scroll to Alarm Clock and press OK.

The alarm is turned off. The asterisk before the time display is no longer shown.

Stopping the Alarm Sound

An alarm clock rings and the LED flashes (about 30 seconds). Press any key on the handset to turn off the alarm sound.

There is no snooze setting. The alarm will sound until turned off.

Area Codes

To conveniently call back a user from the call log (see page 21) you will need to key in and store the code for the area where your telephone is installed (Local Area Code). If it is installed in a Multiple Area Code Area you will also have to key in and store the Extra Codes for that area.

Local Area Code

- Open the Menu.
- Scroll to BASE SETT and press OK.
- Scroll to AREA CODES and press OK.
- Scroll to LOC A CODE and press OK.
- Key in your Local Area Code.
- Confirm.
- Saved will be displayed.

Extra Codes

- Open the Menu.
- Scroll to BASE SETT and press OK.
- Scroll to AREA CODE and press OK.
- Scroll to EXTRA CODES. The first entry of list of codes will be displayed.
- Press Menu.
- Key in the Extra Code.
- Confirm.
- Saved will be displayed.
- Repeat the last steps until all the Extra Codes for your area have been keyed in.

Press Keys:

Making Calls

Making an External Call

Dial the telephone number. If necessary use the backspace key to correct single digits.

Press the Talk key.

To end the call, press the End key.

- You can also press the Talk key first and then enter the telephone number – each digit is dialed immediately.
- You can cancel the dialing operation with the End key.
- You can insert a pause, for example for international calls, by holding down the Flash key  located in lower left hand corner of handset.

Making Intercom Calls

Intercom calls are calls to other registered handsets and does not tie up your telephone line (for example, calls within your home from the kitchen to the living room).

For example:

Press the Intercom soft key and enter the desired handset's telephone number,

or

Select the desired handset and press the Talk key.

Paging All Handsets

Press the Intercom soft key and then press the Star key

or

press the Talk key.

Ending a Call

Press the End key.

PRV CALL

OUT OF AREA

UNKNOWN

Answering a Call

Press the Talk key.

Pick up the handset from the base station or charger (default: Auto talk, see page 31).

Answering Caller ID Calls

Caller ID is a service provided by the local telephone company which allows your Gigaset to display the name and number of the person who is calling you. Contact your local telephone company to subscribe to Caller ID service.

As incoming call is displayed if follows:

First the number of the incoming call is displayed as follows.

After a moment the name is then displayed as follows.

If the number is stored in your directory, only the name stored will appear.

If you have not applied for Caller ID service.

If the number and/or name is suppressed by the caller, PRV CALL will be displayed instead of the relevant information.

If the number and/or name is not available to your telephone company, OUT OF AREA will be displayed instead of the relevant information..

If the caller is unknown or no available Caller ID information is received by the local telephone company.

- If the incoming name is longer than 12 letters only the first 11 are displayed.
- If the incoming number is longer than 12 letters only the first 11 are displayed.

Press Keys:

Calling from Call Log

When your Local Area Code and any Extra Codes have been stored in your telephone, it will behave as described below in the case of a call from the call log list:

Single Area Code Area (Local Area Code and no Extra Code are stored)

If the Area Code of the call log entry is identical to the stored Local Area Code, only the 7digit DID number will be dialed. A "1" will otherwise be prefixed to the call log entry number.

Multiple Area Code Area (Local Area Code and Extra Code(s) are stored)

If the Area Code of the call log entry is identical to the stored Local Area Code or one of the Extra Codes, the call log entry will be dialed unchanged. A "1" will otherwise be prefixed to the call log entry number.

Important: There are certain exceptional cases (such as a long distance call despite the same Area Code, Metro Numbers) which are not covered by this check. In these cases please dial the correct number manually.

Open the Call Log.

Copying Call Log Number to the Directory

- Open the Call Log.
- Scroll to Call Log and press OK.
- Scroll to the telephone number.
- Open the Menu.
- Scroll to Send To Directory and press OK.
- If necessary, using the keypad, edit the number and press OK.
- Using the keypad, edit the name and press OK..

- Please note that numbers copied from the call log list to the telephone book may require editing, for example adding a "1" or removing the Area Code (see page 16).
- You can also store a telephone number during an active call by pressing **MENU** and scrolling to **SEND TO DIR**.

Deleting the Call Log

- Open the Call Log.
- Scroll to Call Log and press OK.
- Open the Menu.
- Scroll to Delete Log and press OK.

Finding Out the Status of a Call

In the Call Log you can also display whether an entry is new or old or whether the call was answered.

- Open the Call Log.
- Scroll to Call Log and press OK.
- Scroll to the Call Log entry and open the Menu.
- Scroll to Details and press OK.

The handset display shows:

- | | |
|---------------------|---|
| NEW 02/04 | The second of four new calls in the list |
| OLD 01/03 | The first of three calls that were already in the list. |
| ANSWERED | The call has been answered (LIST TYPE ALL) . |
| NEW NET MESS | The Telco Voice Mail message is new in the list. |
| OLD NET MESS | The Telco Voice Mail message is old in the list. |

Press Keys:

Call Waiting

If you subscribe to Call Waiting on Caller ID, the incoming name and number is displayed while on a call.

Answering a Waiting Call

While engaged in an active call, you hear the Call Waiting tone. Announce to the first caller that you will be put them or her on hold. Press the Flash key  on the bottom left of the handset to answer the second caller.

Reconnecting to the first Call

Press Flash key  again, to reconnect the first caller. You may toggle between the two callers at any time by pressing the Flash key.

Advanced Features

Some telephone companies off the features below to handle waiting calls.

Select from among the following options during the incoming waiting tone:

The options are selected as follows:

Open the Menu. Scroll to one of the following options and select by pressing OK.

Forwards the incoming call to your voice mail at the central office.

Puts the incoming call on hold and plays a Hold announcement.

Asks the incoming caller to call back. Do not accept the call.

Tells the telephone company to initiate a conference call which allows all three parties to talk.

 Any recorded announcements associated with the options are defined and recorded by the telephone company and cannot be changed by the Gigaset.

Handset Operation

You can register and operate up to four handsets at the Gigaset 4010 base station

Registering and Deregistering Handsets

The handset that comes with the system is automatically registered with the base station. To register additional handsets, follow the procedures described in this chapter.

Automatic Registration

Automatic registration is possible for only the supplied handset and any additional Gigaset 4000 or 4200 handsets. Before using your handset, turn it off and place it in the base station with the display facing you. After approximately one minute, the handset will be registered and its internal (intercom) number is shown (for example, 2).

Up to three additional handsets may be added to the system for a total of four handsets.

The next unassigned intercom number (2 through 4) is automatically assigned to the handset. If all numbers are assigned, the intercom number 4 is re-assigned.

Press Keys:

MENU
↓ REGISTER HS OK

REGISTER HS
OK

MENU

↓ DE-REGISTER OK

DE-REGISTER? OK

Manual Registration

You may also manually register additional handsets to your base station.

Open the Menu.

Scroll to Register Handsets and press OK.

PIN is displayed.

Enter the 4-digit system PIN (default: 0000) and press OK (see page 32 for Changing System PIN).

Entry will be flashing.

Press OK at the flashing prompt.

Underside of the base station

Hold down the Page/Registration key on the underside of the base station for approximately 10 seconds until a signal tone is heard from the base station.

If all internal handset numbers are assigned, the intercom number 4 is reassigned. The handset that has been registered under number 4 will be deregistered.

When it has been successfully registered, the handset reverts to the idle state.

De-registering Handsets

Press the Intercom soft key.

Scroll to the handset to be de-registered.

Open the Menu.

Scroll to De-register and press OK.

PIN is displayed.

Enter the 4-digit system PIN (default: 0000) and press OK.

Press OK at the prompt.

Press the Talk key and a beep will signal the active call.

During the call, you see the display Listening In.

Press the End key.

or

Replace the handset in the base station or charger to leave the call.

Turning the Ringer On/Off

All handsets ring when there is an incoming call. You can turn off the ringer.

 Hold down the asterisk key until the handset does not ring any more.

The ringer is deactivated.

 To reactivate the ringer, press the asterisk key..

Press Keys:

Paging

Press the Page/Registration button on the bottom side of the base station very briefly.

All handsets ring at the same time.

To End Paging

Press the Page/Registration button again.

Press the Talk key on a handset.

Resetting a Handset to the Default Setting

You may want to reset your handset to its default settings. The Directory, the Memory Dial list, and the Call Log are not deleted when you reset the handset. Registration at the base station is not affected.

MENU

Open the Menu.

Press the 9 key and then the 3 key to activate the procedure.

DEFAULT?

OK

Press OK at the prompt.

Then turn your handset off and on to complete the procedure.

Individual Handset Settings

You can set your handset according to your wishes to distinguish it from the standard settings and to maximize convenience.

Change the Display Language of a Handset

Open the Menu.

Press the 9 key and the 2 key followed by:

English (default),
French,
Spanish.

Modifying the Volume and Changing the Melody

Handset Volume

You can choose from three levels of volume for the handsets – even during a call.

Open the Menu.

Scroll to Handset Settings and press OK.

Select Handset Volume and press OK.

You hear the current volume and its level is displayed. Scroll to the desired volume and press OK.

Ringer Volume (Ring Tone)

You can choose from seven options:

- Five ringer volumes (1–5)
- Ring with increasing volume (6)
- No ringer (ringer off: 0)

Open the Menu.

Scroll to Handset Settings and press OK.

Scroll to Ringer and press OK.

You hear the current volume and its level is displayed. Scroll to the desired volume and press OK.

Individual Handset Settings

Ringer Melody

You can choose from ten ringer melodies (1–10).

Open the Menu.

Scroll to Handset Settings and press OK.

Scroll to Melody and press OK.

You hear the current melody and its number is displayed. Scroll to the the desired melody and press OK.

Turning Battery Low Beep On/Off

You are notified that the battery is low either by a flashing icon in the display or by an audible beep. You can choose to turn this beep tone on or off.

Open the Menu.

Turn on the function.

Turn off the function.

Turning Auto Talk On/Off

You can remove the handset from the charging unit without pressing the Talk key to accept a call.

Open the Menu.

Turn on the function.

Turn off the function.

Base Station Settings

Base Station Settings

All base station settings are conveniently made using the handset!

Changing the System PIN

To protect the system settings from unauthorized access, you should change the default PIN (0000) to a PIN that only you know.

- Open the Menu.
- Scroll to Base Settings and press OK.
- Scroll to System PIN and press OK.
- Enter the default system PIN (default: 0000).
- For security reasons, only four asterisks (****) are displayed.
- Press OK.
- Enter the new system PIN (4 digits).
- Four asterisks (****) representing your PIN are displayed again. Press OK.
- Repeat the new system PIN.
- Press OK.

Resetting the Base Station to the Default Setting

You may want to reset your base station to its default settings. Resetting the base station does not affect the system PIN or handset registration.

- Open the Menu.
- Scroll to Base Settings and press OK.
- Scroll to Default and press OK.
- Enter the system PIN (default setting: 0000) and press OK.
- Press OK at the prompt.

Press Keys:

MENU
↓ BASE SETT OK
↓ SPECIAL FCT OK
DIAL MODE OK
↓ OK

Connecting the Base Station to a PBX

Your Gigaset may be operating behind a PBX.

Changing the Dialing Mode

It is necessary to change the dialing mode only if your PBX does not operate with the preset tone dialing (DTMF – dual-tone multifrequency). Please refer to the operating instructions of your PBX.

Options:

- Tone dialing (DTMF),
- Pulse dialing (P).

Open the Menu.

Scroll to Base Settings and press OK.

Scroll to Special Functions and press OK.

Select Dial Mode and press OK.

Scroll to the desired dialing mode and press OK.

Setting the Flash Time

Prerequisite:

Your PBX requires a flash time different from the preset flash time. Please refer to the operating instructions of your PBX.

Open the Menu.

MENU
↓ BASE SETT OK
↓ SPECIAL FCT OK
↓ FLASH TIME OK
↓ OK

Scroll to Base Settings and press OK.

Scroll to Special Functions and press OK.

Scroll to Flash Time and press OK.

Scroll to the required flash time and press OK.

Options (in milliseconds):

80, 100, 120, 180, 250, 300, and 800

The current setting is marked with a ✓.

Connecting the Base Station to a PBX

Press Keys:

MENU

↓ TEMP DTMF OK

TALK

MENU

8 TUV 9 WXYZ 1 0.0 6 MNO

For example:

OK

Switching Temporarily to Tone Dialing

If your PBX still operates with dial pulsing (DP) but tone dialing (DTMF) is required (for example, to check the mailbox), you must switch to tone dialing (DTMF) during the call.

Prerequisite:
You are making a call.

Open the Menu.

Scroll to Temp DTMF and press OK. Tone dialing is active.

Setting Pauses

With this function you can set the length of the pause inserted automatically after pressing the Talk key before transmitting the telephone number.

Pause after Line Seizure

Open the Menu.

Initiate the setting.

Enter the pause length.

Length in seconds:

1 0.0 = 1; 2 ABC = 3; 3 DEF = 7; and 4 GHI = 2.5

The setting is saved.

Appendix

Character Map

	1 x	2 x	3 x	4 x	5 x	6 x
	␣	1				
	A	B	C	2		
	D	E	F	3		
	G	H	I	4		
	J	K	L	5		
	M	N	O	6		
	P	Q	R	S	7	
	T	U	V	8		
	W	X	Y	Z	9	
	+	0	-		?	_
	*	/	()	,	
	␣					

Press the relevant key repeatedly or hold it down.

Control the cursor with . Delete a character with . Characters are always inserted to the left of the cursor.

The entries are sorted in the following sequence:

1. Blank (␣)
2. Digits (0 to 9)
3. Letters (alphabetical)
4. Remaining characters

To avoid the alphabetical sequence of the entries in the directory, enter a blank before the name. This entry then goes to the first position.

Example: entering "␣Karla").

Troubleshooting

Maintenance

Simply wipe the base station and handset with a **damp cloth** or an antistatic wipe.
Never use a dry cloth as this can cause static discharge!

Troubleshooting

If your telephone does not behave the way you want it to, first try to solve the problem using the following list. Siemens Customer Care 1-888-777-0211.

Problem	Possible cause	Solution
No display.	Handset not on	Hold down the end call key  for 1 second
	Batteries empty	Charge or replace the batteries (see page 4).
No reaction to keystroke.	Keypad protection on	Hold down the  key for 1 second
No radio connection to the base station – all displays flashing.	Handset outside the base station range.	Move closer to the base station.
	Handset not registered	Register the handset see page 24.
	Base station off	Check the power connector at the base station (see page 2).
Handset in the base station is not charging.	Line seized by a second handset for a long period.	Maximum charging power is best achieved when phone is in idle state.
The incoming call number is not displayed although you have subscribed to the caller ID Service.	The telephone number transmission is blocked.	Callers must permit the transmission of their telephone numbers at their network providers.
Error beep is generated (descending tone sequence)	Wrong input	Repeat the procedure; note the display and, if necessary, refer to the operating instructions.

Customer Care Warranty for Cordless Products

Customer Care Warranty for Cordless Products

To obtain Siemens Customer Care Warranty service,
product operation information, or for problem resolution, call:

Toll Free: 1-888-777-0211

7:00 a.m. – 10:00 p.m. Central Standard Time EVERY DAY

THIS WARRANTY IS VALID ONLY ON SIEMENS CORDLESS PRODUCTS PURCHASED AND USED IN THE UNITED STATES OF AMERICA, EXCLUDING ALL U.S. TERRITORIES AND PROTECTORATES. IT IS ALSO VALID IN CANADA AND ITS TERRITORIES. THIS WARRANTY APPLIES ONLY TO THE ORIGINAL RETAIL USER, AND DOES NOT APPLY TO PRODUCTS USED FOR ANY INDUSTRIAL, PROFESSIONAL, OR COMMERCIAL PURPOSE. THE ORIGINAL DATED BILL OF SALE OR SALES SLIP MUST BE SUBMITTED AT THE TIME WARRANTY SERVICE IS REQUESTED.

Subject to the OBLIGATIONS above and EXCLUSIONS at right, Siemens Customer Care (SCC) warrants this Siemens Cordless Product against defects in materials and workmanship for the periods of PARTS and LABOR specified at right. SCC will, at its option, within 48 hours after its receipt of a Siemens Cordless Product that fails to conform to this warranty at SCC's designated facility, either (a) repair such product or any of its parts which fail to conform to this warranty, or (b) ship a replacement product. The warranty period commences on the date the product was first purchased at retail.

1 YEAR PARTS & LABOR

EXCLUSIONS: This warranty does not cover (a) the adjustment of customer-operated controls as explained in the appropriate model's instruction manual, or (b) the repair of any product which has been altered or defaced. This warranty shall not apply to the cabinet or cosmetic parts, antenna, buttons, batteries, or routine maintenance. This warranty does not apply to repairs or replacements necessitated by any cause beyond the control of SCC including, but not limited to, any malfunction, defect or failure caused by or resulting from unauthorized service or parts, improper maintenance, damage from leaking batteries, operation contrary to furnished instructions, shipping or transit accidents, modification or repair by the user, abuse, misuse, neglect, accident, incorrect line voltage, fire, flood or other Acts of God, or normal wear and tear.

The foregoing is in lieu of all other expressed warranties and SCC does not assume or authorize any party to assume for it any other obligation or liability.

THE DURATION OF ANY WARRANTIES WHICH MAY BE IMPLIED BY LAW (INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS) IS LIMITED TO THE TERM OF THIS WARRANTY. IN NO EVENT SHALL SCC BE LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING FROM OWNERSHIP OR USE OF THIS PRODUCT, OR FOR ANY DELAY IN THE PERFORMANCE OF ITS OBLIGATIONS UNDER THIS WARRANTY DUE TO CAUSES BEYOND ITS CONTROL. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS AND/OR DO NOT ALLOW THE EXCLUSION OR LIMITATION OF CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS AND EXCLUSIONS MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE.

Customer Care Warranty for Cordless Products

FCC Information

Warning: Changes or modifications to this unit not expressly approved by Siemens Cordless Products could void the FCC authority to operate the equipment. This includes the addition of any external antenna device.

This telephone system complies with Part 68 of the FCC rules. On the bottom of the base station is labeling that contains, among other information the FCC Registration Number and the Ringer Equivalence number (REN). You must, upon request, provide this information to your telephone company.

The REN is useful in determining the quantity of devices you may connect to your telephone line and still have all of those devices ring when your telephone number is called. In most, but not all areas, the sum of the RENs of all devices connected to one line should not exceed five (5.0). To be certain of the number of devices you may connect to your line, as determined by the REN, you should contact your local telephone company to determine the maximum REN for your calling area.

If your telephone equipment causes harm to the telephone network, the telephone company may ask you to disconnect the system from the line until the problem has been corrected or they may discontinue your service temporarily. If possible, they will notify you in advance. But if advance notice isn't practical, you will be notified as soon as possible. You will be informed of your right to file a complaint with FCC.

Your telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the proper functioning of your telephone system. If they do, you will be notified in advance to give you an opportunity to maintain uninterrupted telephone service. If you experience trouble with this telephone system, disconnect it from the network until the problem has been corrected or until you are sure that the equipment is not malfunctioning.

This telephone system may not be used on coin service provided by the telephone company. Connection to party lines is subject to state tariffs. Privacy of communications may not be ensured when using this phone.

This telephone system equipment has been tested and found to comply with the limits for Class B digital device, pursuant to Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Some cordless telephones operate at frequencies that may cause interference to nearby TV's and VCR's; to minimize or prevent such interference, the system base should not be placed near or on top of a TV or VCR; and, if interference is experienced, moving the base farther away from the TV or VCR will often reduce or eliminate the interference.

However, there is no guarantee that interference will not occur in a particular installation. If this telephone system does cause harmful interference to radio or television reception, which can be determined by turning the system off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Increase the separation between the base station and receiver.
2. Connect the base station into an outlet on a circuit different from that to which the receiver is connected.
3. Consult the dealer or an experienced radio TV technician for help.

Notice to Hearing Aid Wearers: This phone system is compatible with inductively coupled hearing aids.

Power Outage: In the event of a power outage, your cordless telephone will not operate. The cordless telephone requires electricity for operation. You should have a telephone that does not require electricity available for use during power outages.

Notice: The installation of the base unit should allow at least 8 inches between the base and persons to be in compliance with FCC RF exposure guidelines.

Safety Precautions

Before using your telephone equipment, basic safety instructions should always be followed to reduce the risk of fire, electric shock and injury to persons.

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall telephone jack and power outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use damp cloth for cleaning.
4. Do not use this product near water, for example, near a bathtub, wash bowl, kitchen sink, or laundry tub, in a wet basement or near a swimming pool.
5. Place this product securely on a stable surface. Serious damage and/or injury may result if the unit falls.
6. Slots or openings in the cabinet and the back and bottom are provided for ventilation, to protect it from overheating. These openings must not be blocked or covered. This product should never be placed near or over a radiator or heat register, or in a place where proper ventilation is not provided.
7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
8. Do not place objects on the power cord. Install the unit where no one can step or trip on the cord.
9. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric shock.
10. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in the risk of fire or electric shock. Never spill liquid of any kind on this product.
11. To reduce the risk of electric shock or burns, do not disassemble this product. Take it to a qualified service center when service is required. Opening or removing covers may expose you to dangerous voltages, dangerous electrical current or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
12. Unplug the product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
 - a.) When the power cord is damaged or frayed.
 - b.) If liquid has been spilled into the product.
 - c.) If the product has been exposed to rain or water.
 - d.) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions because improper adjustment of other controls may result in damage and may require extensive work by a qualified technician to restore the product to normal operation.
 - e.) If the product has been dropped or physically has been damaged.
 - f.) If the product exhibits a distinct change in performance.
13. Avoid using a telephone (other than a cordless type) during a thunderstorm. There may be a remote risk of electrical shock from lightning.
14. Do not use the telephone to report a gas leak in the vicinity of the leak.
15. Emergency/911 numbers may not be dialed if the keypad is locked.

BATTERY SAFETY PRECAUTIONS: To reduce the risk of fire, injury or electric shock, and to properly dispose of batteries, please read and understand the following instructions.

CONTAINS NICKEL CADMIUM BATTERY. BATTERY MUST BE RECYCLED OR DISPOSED OF PROPERLY. DO NOT DISPOSE OF IN MUNICIPAL WASTE.

1. Only use the batteries specified for use with this product.
2. DO NOT USE ALKALINE OR LITHIUM BATTERIES, or mix batteries of different sizes or from different manufacturers in this product. DO NOT USE NONRECHARGEABLE BATTERIES.

Limited Warranty

3. Do not dispose of the batteries in a fire; the cells may explode. Do not expose batteries to water. Check with local codes for special disposal instructions.
4. Do not open or mutilate the batteries. Released electrolyte is corrosive and may cause damage to the eyes or skin. The electrolyte may be toxic if swallowed.
5. Exercise care in handling the batteries in order not to short the batteries with conducting materials such as rings, bracelets, and keys. The batteries or conducting material may overheat and cause burns or fire.
6. Charge the batteries provided with, or identified for use with, this product only in accordance with the instructions and limitations specified in the user's manual. Do not attempt to charge the batteries with any means other than that specified in the user's manual.
7. Periodically clean the charge contacts on both the charger and handset.

Limited Warranty

This limited, non-transferable warranty is provided to the original purchaser. The product is warranted to be free from defects in materials and workmanship under normal installation, use, and service for period of one (1) year from the date of purchase as shown on the purchaser's receipt.

Our obligation under this warranty is limited to repair or replacement (at our option) of the product or any part(s) which are defective provided that the product is returned to Siemens Customer Care during the warranty period. A copy of the purchase receipt must accompany products returned. In the absence of a purchase receipt, the warranty period shall be one (1) year from the date of manufacture. Repair or replacement of the product is your sole and exclusive remedy.

If the product is repaired, reconditioned component parts or materials may be used. If the product is replaced, we may choose to replace it with a new or reconditioned product of the same or similar design. The repaired or replacement product will be warranted for either (a) 90 days or (b) the remainder of the original one (1) year warranty period, whichever is longer. Batteries are warranted to be free from defects at the time of purchase.

This warranty does not apply to defects outside of our control, including but not limited to acts of God, fire, flood, damage while in transit to service facility. We do not warranty that the product will be compatible with any telephone equipment or systems or party lines.

This warranty shall be void if the product is damaged as a result of defacement, misuse, abuse, neglect, accidents, destruction, or alteration of the serial number, improper electrical voltages or currents, repair, alteration or maintenance by any person or party other than our authorized service facility or any violation of instructions furnished by us.

This warranty is also void if this product is removed from the country in which the original purchaser purchased it, if it is used in a country, which it not registered for use, or if it is used in a country for which it was not designed. Due to variations in telephone systems and communications laws, this product may be illegal for use in some countries. We assume no responsibility for damages or penalties incurred resulting from the use of this product in a manner or location other than that for which it is intended.

THIS ONE-YEAR LIMITED WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES EXPRESS OR IMPLIED. ANY IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED IN DURATION TO THE ONE-YEAR DURATION OF THIS WRITTEN LIMITED WARRANTY. WE DISCLAIM ANY LIABILITY FOR DAMAGES FOR LOSS OF USE OF THE PRODUCTS, LOSS OF TIME, INCONVENIENCE, INJURY TO CUSTOMER OR ANY OTHER PERSON, OR DAMAGE TO CUSTOMER PROPERTY CAUSED BY THE PRODUCT, LOSS OF REVENUE OR PROFIT, OR DAMAGES FOR ANY FAILURE TO PERFORM. IN NO EVENT SHALL WE BE LIABLE FOR ANY SPECIAL, INCIDENTAL, PUNITIVE OR CONSEQUENTIAL DAMAGES EVEN IF WE ARE ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Limited Warranty

Some states do not allow limitations on how long an implied warranty lasts, so the above limitations may not apply to you.

This warranty is the sole and exclusive warranty provided for the product. There are no other express warranties. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.
